

Total No. of Printed Pages: 01

SUBJECT CODE NO: RNP-8011
FACULTY OF SCIENCE AND TECHNOLOGY
S.E (EEE / EE / EEP) (NEP) Sem - III
Examination May/June-2026
Electrical Measuring Techniques

[Time: 1:30 Hours]**[Max. Marks: 30]**

Please check whether you have got the right question paper.

N. B

1. Part A: Question No 1 is compulsory.
2. Attempt any four questions from remaining Part B: Q.2 to Q.7.

Part A**Q1 Solve any 5 following questions****2 x 5 =10**

1. Which of the following is a static characteristic of an instrument?
 A) Speed of response B) Accuracy
 C) Fidelity D) Lag
2. In indicating instruments, deflecting torque is opposed by:
 A) Damping torque B) Controlling torque
 C) Friction torque D) Gravity torque
3. Damping torque is provided to
 A) Increase sensitivity B) Reduce oscillations
 C) Increase deflection D) Improve accuracy
4. PMMC instruments work on the principle of
 A) Electromagnetic induction B) Moving iron effect
 C) Lorentz force D) Electrostatic force
5. The range of an ammeter is extended by using
 A) Multiplier B) Shunt
 C) Transformer D) Capacitor
6. The range of a voltmeter is extended by using
 A) Shunt B) Multiplier
 C) Inductor D) Transformer
7. In a CRO, Lissajous patterns are used to measure:
 A) Voltage B) Current
 C) Frequency D) Resistance

Part B**Solve any four from the following**

- | | |
|---|-----------|
| Q. 2 Explain different types of standards used in measurement system. | 05 |
| Q. 3 Differentiate between MI & MC instruments. | 05 |
| Q. 4 Draw and explain block diagram of digital Voltmeter? | 05 |
| Q. 5 Explain classification of transducers in detail. | 05 |
| Q. 6 Draw construction and explain working of single-phase energy meter. | 05 |
| Q. 7 Difference between CT & PT | 05 |
