

Total No. of Printed Pages: 1

**SUBJECT CODE NO: - RNP-8055**  
**FACULTY OF SCIENCE AND TECHNOLOGY**  
**S.E (EEE / EE / EEP) (NEP) Sem - IV**  
**Examination May/June-2026**  
**Electrical Power Transmission and Distribution**

**[Time: 1:30 Hours]****[Max. Marks: 30]**

N. B

Please check whether you have got the right question paper.

- 1) Use of non-programmable calculator is allowed.
- 2) Q.no.1 is compulsory.
- 3) Solve any four questions from Question No. 2, 3, 4, 5, 6 and 7.

- |           |                                                                                                                                                                                                                                                                                                     |           |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q1</b> | <b>Solve any FIVE from the following questions.</b>                                                                                                                                                                                                                                                 | <b>10</b> |
|           | <ol style="list-style-type: none"> <li>1. What is electrical power distribution system?</li> <li>2. Define diversity factor.</li> <li>3. Define sag.</li> <li>4. Define string efficiency.</li> <li>5. What is skin effect?</li> <li>6. Define G.M.R.</li> <li>7. What is corona effect?</li> </ol> |           |
| <b>Q2</b> | Describe radial and ring main distribution systems.                                                                                                                                                                                                                                                 | <b>5</b>  |
| <b>Q3</b> | Classify overhead conductors and explain in brief.                                                                                                                                                                                                                                                  | <b>5</b>  |
| <b>Q4</b> | Explain load curve and load duration curve.                                                                                                                                                                                                                                                         | <b>5</b>  |
| <b>Q5</b> | Explain suspension type insulator with neat diagram.                                                                                                                                                                                                                                                | <b>5</b>  |
| <b>Q6</b> | Describe construction of underground cable.                                                                                                                                                                                                                                                         | <b>5</b>  |
| <b>Q7</b> | Describe capacitance of three-phase line with equilateral spacing.                                                                                                                                                                                                                                  | <b>5</b>  |
